### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election without traverse of claims 1-8 and 18-23 in the reply filed on July 10, 2009 is acknowledged.

2. Further restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1A, claims 1-8, drawn to an ion doping apparatus, classified, for example, in class 250, subclass 492.21.

Group 1B, claims 18-23, drawn to methods, classified for example, in class 438, subclass 514.

3. The inventions listed as Groups A and B do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The feature common to claims 1-8 and 18-23 is, "beam current is measured a plurality of times, before implantation (of a target)." However, this feature is not novel since it is disclosed, for example, in JP 2001-101990 (abstract).

Consequently, the common feature is not a special technical feature within the meaning of PCT Rule 13.2, since it makes no contribution over the prior art.

Furthermore, there is no other feature common to claims 1-8 and claims 18-23.

Since there exists no other common feature which can be considered as a special technical feature within the meaning of PCT Rule 13.2, no technical relationship within the meaning of PCT Rule 13 between the different inventions can be seen.

Consequently, claims 1-8 along with claims 18-23 do not satisfy the requirement of unity of invention.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
